Flexible collaboration transparency: supporting worker independence in replicated application-sharing systems

James Begole, Mary Beth Rosson, Clifford A. Shaffer

June 1999 ACM Transactions on Computer-Human Interaction (TOCHI), Volume 6 Issue 2

Publisher: ACM Press

Full text available: pdf(312.22 KB)

Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index</u> <u>terms</u>, <u>review</u>

This article presents a critique of conventional collaboration transparency systems, also called "application-sharing" systems, which provide the real-time shared use of legacy single-user applications. We find that conventional collaboration transparency systems are inefficient in their use of network resources and lack support for key groupware principles: concurrent work, relaxed WYSIWIS, and group awareness. Next, we present an alternative approach to implementing collaborat ...

Supporting worker independence in collaboration transparency

James "Bo" Begole, Mary Beth Rosson, Clifford A. Shaffer

November 1998 Proceedings of the 11th annual ACM symposium on User interface software and technology

Publisher: ACM Press

Full text available: pdf(255.78 KB) Additional Information: full citation, references, citings, index terms

**Keywords**: Java, collaboration transparency, computer-suppoted cooperative work, groupware, usability

3 Collaboration transparency in the DISCIPLE framework

Wen Li, Weicong Wang, Ivan Marsic

November 1999 Proceedings of the international ACM SIGGROUP conference on Supporting group work

Publisher: ACM Press

Full text available: pdf(2.04 MB)

Additional Information: full citation, abstract, references, index terms

Sharing single-user software applications is a major goal of synchronous groupware particularly because the majority of applications continues to be developed for single users. We present a mechanism for sharing collaboration-transparent single-user applications in our DISCIPLE collaboration framework. DISCIPLE is the equivalent of a Web browser that allows sharing applets (Java components, both transparent and aware of collaboration). It allows users with no programming background to quick ...

Keywords: CSCW frameworks, JavaBeans, collaboration-transparent applications, synchronous groupware

4 Collaboration awareness in support of collaboration transparency: requirements for the next generation of shared window systems

J. Chris Lauwers, Keith A. Lantz

March 1990 Proceedings of the SIGCHI conference on Human factors in computing systems: Empowering people

Publisher: ACM Press

Full text available: pdf(1.18 MB)

Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, index

Shared window systems enable existing applications to be shared in the context of a realtime teleconference. The development and successful use of several such systems, albeit within limited user communities, testifies to the merits of the basic idea. However, experience to date has suggested a number of areas that have not been adequately addressed, namely: spontaneous interactions, shared workspace management, floor control, and annotation and telepointing. This paper focuses on the rami ...

5 Empirical evaluation of multi-level buffer cache collaboration for storage systems Zhifeng Chen, Yan Zhang, Yuanyuan Zhou, Heidi Scott, Berni Schiefer

June 2005 ACM SIGMETRICS Performance Evaluation Review, Proceedings of the 2005 ACM SIGMETRICS international conference on Measurement and modeling of computer systems SIGMETRICS '05, Volume 33 Issue 1

Publisher: ACM Press

Full text available: pdf(379.25 KB) Additional Information: full citation, abstract, references, index terms

To bridge the increasing processor-disk performance gap, buffer caches are used in both storage clients (e.g. database systems) and storage servers to reduce the number of slow disk accesses. These buffer caches need to be managed effectively to deliver the performance commensurate to the aggregate buffer cache size. To address this problem, two paradigms have been proposed recently to collaboratively manage these buffer caches together: the *hierarchy-aware caching* maintains ...

6 Systems: Leveraging single-user applications for multi-user collaboration: the coword

approach

Steven Xia, David Sun, Chengzheng Sun, David Chen, Haifeng Shen November 2004 Proceedings of the 2004 ACM conference on Computer supported cooperative work

Publisher: ACM Press

Additional Information: full citation, abstract, references, citings, index Full text available: pdf(536.98 KB) terms

Single-user interactive computer applications are pervasive in our daily lives and work. Leveraging single-user applications for multi-user collaboration has the potential to significantly increase the availability and improve the usability of collaborative

applications. In this paper, we report an innovative <i>transparent adaptation</i>approach for this purpose. The basic idea is to adapt the single-user application programming interface to the data and operational models of the un ...

**Keywords**: application sharing, operational transformation, real-time collaborative word processor, transparent adaptation

7 Transparent sharing of Java applets: a replicated approach

James Begole, Craig A. Struble, Clifford A. Shaffer, Randall B. Smith

October 1997 Proceedings of the 10th annual ACM symposium on User interface software and technology

**Publisher: ACM Press** 

Full text available: pdf(1.43 MB) Additional Information: full citation, references, citings, index terms

**Keywords**: Java, collaboration transparancy, computer-supported cooperative work, groupware

8 Groupware infrastructure: Transparent sharing and interoperation of heterogeneous

Du Li, Rui Li

November 2002 Proceedings of the 2002 ACM conference on Computer supported cooperative work

Publisher: ACM Press

Full text available: pdf(376.29 KB)

Additional Information: full citation, abstract, references, citings, index terms

Multi-user applications generally lag behind in features or compatibility with single-user applications. As a result, users are often not motivated to abandon their favorite single-user applications for groupware features that are less frequently used. A well-accepted approach, collaboration transparency, is able to convert off-the-shelf single-user applications into groupware without modifying the source code. However, existing systems have been largely striving to develop generic applic ...

**Keywords**: application sharing, collaboration transparency, group editing, heterogeneity, interoperation

<sup>9</sup> DCWPL: a programming language for describing collaborative work

, Mauricio Cortés, Prateek Mishra

November 1996 Proceedings of the 1996 ACM conference on Computer supported cooperative work

**Publisher: ACM Press** 

Full text available: pdf(1.12 MB) Additional Information: full citation, references, citings, index terms

**Keywords**: CSCW, coordination, distributed systems, groupware, programming languages, reengineering

10 <u>Transparency and awareness in a real-time groupware system</u>
Michel Beaudouin-Lafon, Alain Karsenty
December 1992 **Proceedings of the 5th annual ACM symposium on User interface** 

## software and technology

Publisher: ACM Press

Full text available: pdf(1.12 MB)

Additional Information: full citation, abstract, references, citings, index terms

This article explores real-time groupware systems from the perspective of both the users and the designer. This exploration is carried out through the description of GroupDesign, a real-time multi-user drawing tool that we have developed. From the perspective of the users, we present a number of functionalities that we feel necessary in any real-time groupware system: Graphic & Audio Echo, Localization, Identification, Age, and History. From the perspective of the designer, we demonstra ...

## 11 Session 1: Decentralized ad-hoc groupware API and framework for mobile

Dominik Buszko, Wei-Hsing (Dan) Lee, Abdelsalam (Sumi) Helal

September 2001 Proceedings of the 2001 International ACM SIGGROUP Conference on **Supporting Group Work** 

Publisher: ACM Press

Full text available: pdf(516.64 KB) Additional Information: full citation, abstract, references, index terms

We describe a mobile collaborative system designed for wireless, ad-hoc collaboration. In recent years, mobile computing has emerged as a new discipline in the field of computer science. Due to advances in technology, portable computing devices have become more pervasive. From smart phones, and personal digital assistants (PDAs) running embedded operating systems, to portable computers running conventional desktop operating systems, these devices have increasingly provided communication capabili ...

Keywords: ad-hoc collaboration, decentralized groupware, mobile and wireless collaboration

12 Lessons learned from employing multiple perspectives in a collaborative virtual

environment for visualizing scientific data

Kyoung S. Park, Abhinav Kapoor, Jason Leigh

September 2000 Proceedings of the third international conference on Collaborative virtual environments

Publisher: ACM Press

Additional Information: full citation, abstract, references, citings, index Full text available: pdf(289.25 KB)

This paper explores the concept of multiple perspectives to enhance collaboration by allowing remote participants to tailor their views, user-interfaces and roles to their particular needs and expertise. It describes a preliminary design study conducted on users of a collaborative CAVE-based virtual reality tool for visualizing occanographic data. Results will focus on the patterns of activity within this environment, in particular the manner in which participants transition between individ ...

Keywords: CSCW, awareness, multiple perspectives, subjective views

13 TeamBox: an exploration of collaborative interoperability

Munir Mandviwalla, Peter Grillo

August 1995 Proceedings of conference on Organizational computing systems

Publisher: ACM Press

Full text available: pdf(741.01 KB) Additional Information: full citation, abstract, references, index terms

Given that teams will tend to use a combination of generic groupware and individual

applications, there is a need to address issues of interoperability. However, traditional system interoperability that focuses on making data and applications more accessible may not suffice. In collaborative work, the creating and acting on knowledge is inter-related. Collaborative interoperability should support the sharing and coordination of the knowledge represented by the relationships and context of t ...

14 Videodraw: a video interface for collaborative drawing

John C. Tang, Scott L. Minneman

April 1991 ACM Transactions on Information Systems (TOIS), Volume 9 Issue 2

Publisher: ACM Press

Full text available: pdf(1.39 MB)

Additional Information: full citation, references, citings, index terms

**Keywords**: colloborative systems, gestural interfaces, shared drawing, user interface, video technology, work practice analysis

15 Tools for supporting the collaborative process

James R. Rhyne, Catherine G. Wolf

December 1992 Proceedings of the 5th annual ACM symposium on User interface software and technology

Publisher: ACM Press

Full text available: pdf(994.47 KB)

Additional Information: full citation, abstract, references, citings, index terms

Collaborative software has been divided into two temporal categories: synchronous and asynchronous. We argue that this binary distinction is unnecessary and harmful, and present a model for collaboration processes (i.e. the temporal record of the actions of the group members) which includes both synchronous and asynchronous software as submodels. We outline an object-oriented toolkit which implements the model, and present an application of its use in a pen-based conferencing to ...

Supporting collaborative writing of hyperdocuments in SEPIA

Jörg M. Haake, Brian Wilson

December 1992 Proceedings of the 1992 ACM conference on Computer-supported cooperative work

Publisher: ACM Press

Full text available: pdf(1.13 MB) Additional Information: full citation, references, citings, index terms

Keywords: CSCW, collaborative writing, hypertext, hypertext authoring, modes of collaboration

17 Explaining collaborative filtering recommendations

December 2000 Proceedings of the 2000 ACM conference on Computer supported cooperative work

Publisher: ACM Press

Additional Information: full citation, abstract, references, citings, index Full text available: pdf(167.40 KB)

Automated collaborative filtering (ACF) systems predict a person's affinity for items or information by connecting that person's recorded interests with the recorded interests of a community of people and sharing ratings between like-minded persons. However, current

recommender systems are black boxes, providing no transparency into the working of the recommendation. Explanations provide that transparency, exposing the reasoning and data behind a recommendation. In this paper, we address ex ...

Keywords: GroupLens, MoviesLens, collaborative filtering, explanations, recommender systems

18 Collocation and virtual collocation: Integrating 2D and 3D views for spatial

collaboration

Wendy A. Schafer, Doug A. Bowman

November 2005 Proceedings of the 2005 international ACM SIGGROUP conference on Supporting group work GROUP '05

Publisher: ACM Press

Full text available: pdf(969.80 KB) Additional Information: full citation, abstract, references, index terms

Spatial collaboration is a specialized form of collaboration where the discussion relates to a physical space. This work investigates how to support distributed spatial collaboration activities. It presents a novel prototype that integrates both two-dimensional and threedimensional representations. This collaborative software is examined in a qualitative study as a group virtually rearranges their lab furniture. The results describe the group's collaboration and their use of the combined repres ...

Keywords: awareness, collaborative virtual environments (CVE), collaborative visualization, groupware, interactive maps

19 Computer-supported cooperative work in design: A collaborative platform for fixed

and mobile networks

Federico Bergenti, Agostino Poggi, Matteo Somacher

November 2002 Communications of the ACM, Volume 45 Issue 11

Publisher: ACM Press

Full text available: 📆 pdf(305.86 KB)

html(29.88 KB)

Additional Information: full citation, abstract, references, index terms

C/Webtop: providing users with a means for collaborating while on the move.

20 VideoWhiteboard: video shadows to support remote collaboration

John C. Tang, Scott Minneman

March 1991 Proceedings of the SIGCHI conference on Human factors in computing systems: Reaching through technology

Publisher: ACM Press

Full text available: pdf(1.45 MB)

Additional Information: full citation, references, citings, index terms
